Snow White and the Seven Plus a Few Dwarfs

At the Čukarica Cultural Centre, students from our school performed the play Snow White and the Seven Plus a Few Dwarfs. The charity performance was held under the slogan "A small gesture from us means a lot to someone." Admission was in the form of sweets, which will bring joy to children from Kosovo. This was our first international play, and we enjoyed every moment. The children performed two consecutive plays without a break, demonstrating their dedication and professionalism. A great deal of work, effort, and, most importantly, love of the dramatic arts was invested in the production. The humanitarian purpose of the event provided additional motivation.

Teachers Jelena Dardić and Vesna Božović expressed their gratitude to their students at the beginning of the performance, emphasizing how proud they are of them. The end of the play left no doubt as to why their pride was so well-placed.

Children Helping Children

Our school once again joined the charity campaign Children Helping Children, started several years ago by H.R.H. Princess Katherine. Each year, Their Royal Highnesses welcome and bring joy to over a thousand children without parental care, children with disabilities, and those from socially vulnerable backgrounds during the traditional Christmas receptions at the White Palace.

Grade 9 students visited the White Palace on Tuesday, 26th November, bringing sweets for children without parental care.

Through a guided tour, they had the opportunity to learn fascinating details about the history of the Royal Family of Serbia and the Royal Compound.

Humanitarian New Year's bazaar

The New Year's bazaar was held on 18.12. in our school. Children from our entire educational system participated. We had volunteers at the booths of all ages. It was very nice that the children were in the spirit of unity and with a great desire to help. Our guests this year were also friends from the Day Care Center, who brought their own products. Like in most bazaar, there was everything to be found: books, decorations, cakes, greeting cards, sweet packages... Everyone chose something, and all proceeds will go to charity.

High School Students' Environmental Initiative

Third-year students of Ruđer Bošković High School, Aleksandar Vasilic and Nada Vesić (3B), have successfully completed their environmental initiative, which they started last year. Just a few days ago, reusable water bottles (thermoses) provided by the company Voden arrived. These bottles will replace plastic cups and will be used by students at the school's water dispensers. The initiative was launched to reduce plastic waste and raise environmental awareness among students. After thorough analysis and planning, the project was implemented with the school's support. The bottles will be distributed to all students and teachers by the start of the next term.

Visit of the "Ruđer Bošković" School to Athens as part of the "Athens-Belgrade: History and Architecture"

From December 3 to 8, 2024, students and teachers from the "Ruđer Bošković" school visited the ACG "Pierce" school in Athens as part of the "Athens-Belgrade: History and Architecture" program. This unique opportunity allowed our students to explore Greek culture, history, and architectural heritage while fostering friendships with their Greek peers.

During the visit, students had the chance to explore iconic sites such as the Greek Parliament, the battleship "Averof," the historic landmarks of Mycenae, and the picturesque town of Nafplio. These excursions provided not only rich educational value but also unforgettable experiences for all participants. Beyond the cultural and educational aspects, this collaboration strengthened the bonds between the two schools, with new friendships promising further exchanges and joint projects in the future. We extend our gratitude to our hosts for their warm hospitality and look forward to continuing this fruitful partnership!

Panel for Parents

During the past week, we started a series of panels aimed at parents on the topics of development, adolescence, and family life. We had the great pleasure of hosting psychologist Vladimir Borovnica and participating in the panel "Transformations in Adolescence as a Potential for Change." Vladimir Borovnica comes from the Department of Adolescent Psychiatry and Psychotherapy at the Dragiša Mišović Clinical Center. His experience in working with families was extremely valuable in understanding the changes and needs in families with adolescents.
