Summer Schools

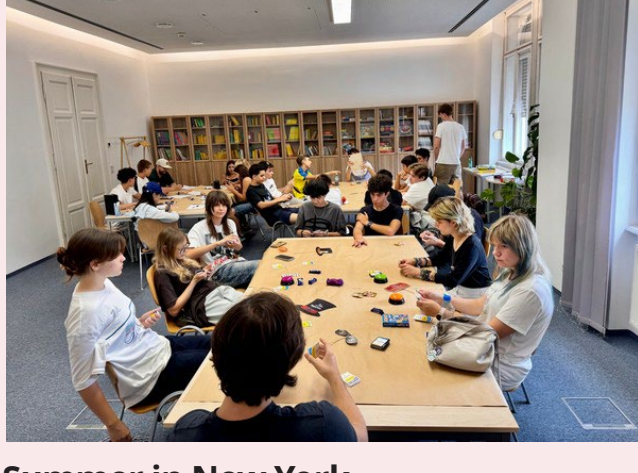

Graz – Learning, Friendship and Unforgettable Adventures

From 9 to 21 August, our students spent two exciting weeks in Graz, attending a summer German language school while discovering one of Austria's most charming cities. Graz surprised us in the best possible way — green, welcoming, playful and full of little discoveries. Every day brought something new: German lessons and an international learning environment, guided city walks, museum visits, sports activities, as well as exciting excursions to Stübing and the fascinating Lurgrotte cave.

With the support of their teachers and young supervisors, students enjoyed a balanced programme of learning, activities and free time. Along the way, they developed their language skills, independence and confidence, while making new friends and creating memories to last long after the summer is over.

A little culture and history, a little nature, lots of laughter and even more wonderful memories. This summer, Graz was much more than a language school. It was an opportunity to learn German through real-life experiences, discover a new place and grow through friendship, exploration and adventure.

See you in Graz next summer!

Summer in New York

Our students Jana Ladjević and Stanislava Podrobnjak spent part of their summer holiday in New York. Organised by Ino Edukacija Agency, their programme at St. John's University included an English language course and the Young Entrepreneur programme. Lectures and workshops gave them the opportunity to gain new knowledge, while spending time with peers from different countries made the experience even more enjoyable.

Accompanied by local guides, they visited some of the city's most famous landmarks and discovered the culture and everyday life of one of the world's most exciting cities. They also had plenty of free time to explore New York and experience the city in their own way.

Learning Spanish in Salamanca

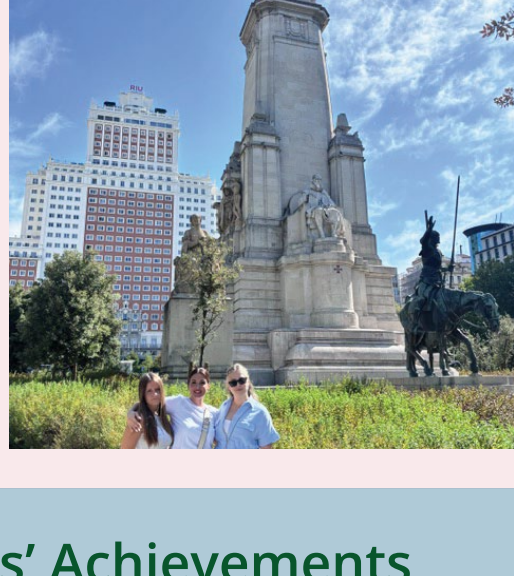

This summer, students from Ruđer Bošković School had the opportunity to learn Spanish in one of the best possible ways – through firsthand experience of life, culture and everyday life in Spain. They stayed in Salamanca, one of Spain's most renowned university cities, where they attended a summer Spanish language course.

In addition to daily language classes, the programme included a variety of cultural and social activities. Students took salsa classes, enjoyed trips to the swimming pool and spending time together, and explored Spanish culture and way of life through a range of activities.

A particular highlight was the trip to Madrid, where they visited some of the Spanish capital's most famous landmarks and had the opportunity to experience both its historical heritage and its contemporary character.

Their stay in Salamanca gave them much more than the opportunity to improve their language skills. Learning Spanish in a natural environment allowed them to use the language every day, discover a new culture, make new friends and become more independent through the experience of living in another country.

For the students of Ruđer Bošković School, this summer will be remembered as a special journey – a combination of language, culture, friendship and unforgettable experiences. After all, a foreign language is best learned when it becomes part of real life.

Celebrating Our Students' Achievements

Bronze for Lana!

Lana Štulić, a 3B class student of our school, won a bronze medal at the World Championship of Social Science Research, held in Bali.

Lana presented her research paper in the field of psychology and achieved an excellent result among 140 high school students from 17 countries.

The competition was held as part of the programme of the Regional Center for Young Talents "Nikola Tesla", whose participants won a total of five medals at these world competitions.

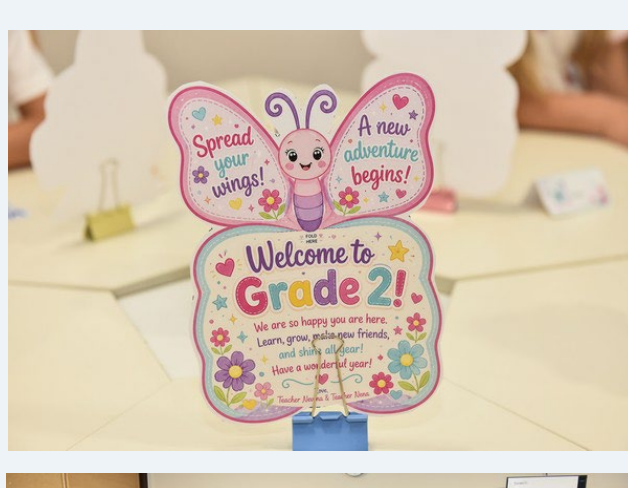

Congratulations to Lana on this incredible achievement!

A Warm Welcome for Our Youngest Students

On Monday, 31 August, we held our traditional welcome event for our grade 1 and grade 2 students. The programme was entirely created and performed by students from our PYP Drama Club.

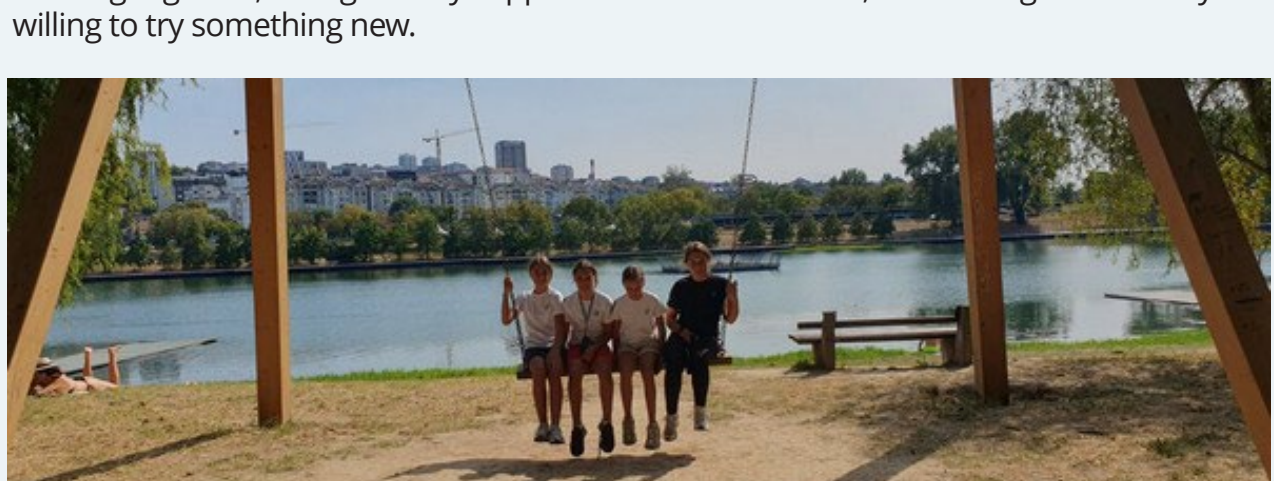

Our youngest students met their class teachers and subject teachers and stepped into their classrooms for the very first time.

Sports Day at Ada – A Great Start to the New School Year!

As is tradition, on Wednesday, 9 September, students in the upper primary grades started the new school year in the best possible way – with a Sports Day at Ada Ciganlija! Surrounded by nature, sunshine, and positive energy, our MYP students enjoyed a variety of sports activities, spent time together, competed, challenged themselves, and, above all, stayed active and engaged with others.

Sports Day was about much more than games and physical activity. Through shared challenges and team activities, students developed important ATL skills, including communication, collaboration, organisation and social skills. At the same time, they demonstrated the attributes of the IB Learner Profile – they were communicators as they encouraged one another, open-minded as they embraced different ways of playing and working together, caring as they supported their teammates, and courageous as they were willing to try something new.

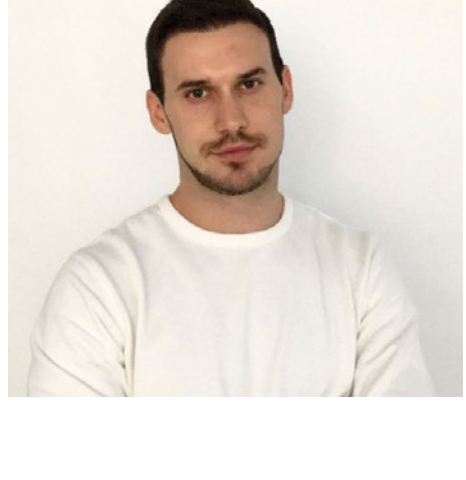

Introducing Our New Teachers

Mirza Koljić

Mathematics and Digital Design Teacher
Education: Bachelor of Mathematics and IT, Faculty of Education, University of Bihać

Professional experience: Bosnia has taught in different educational systems in Bosnia and Herzegovina, Germany, Slovakia and Slovenia, including several years in the IB MYP programme.

In addition to teaching, he has contributed to projects in the fields of education and information technology. As a co-author, he presented a paper on the development of educational games at the BHAAAS international conference.

Nataša Novoselac

Master's Degree in Primary Education
She graduated from the Faculty of Education at the University of Belgrade.

Professional development - She has participated in numerous national and international education projects and workshops.
